

PROJECT UPLIFT

AT A GLANCE

Minnesota Adult & Teen Challenge (MNTC) is a long-standing residential treatment center that serves individuals on the path to recovery. With a strong focus on holistic healing, including physical activity and community-building, MNTC recognized that their outdated outdoor space was no longer serving the needs of their residents.

"As you can see, this is a game changer for our center!"

"This space will provide a multi-function, family-friendly space for our residents and their families."

"Programs based on exactly what you need to change your life for good."

CHALLENGES

- The center's outdoor space was a mix of dirt and aging asphalt, creating a dusty, uneven, and unsafe environment for both children and adults. This limited outdoor engagement and made it difficult to offer consistent activities.
- There was no structure to accommodate both play and relaxation in a single, cohesive space.
- MNTC wanted a beautiful, functional area that visually and emotionally supported the journey to long-term recovery.

SOLUTIONS

VersaCourt's customizable, durable surfaces are designed to adapt to any space, offering vibrant colors, multiple game options, and long-lasting performance for family-friendly environments.

CUSTOMIZABLE DESIGN

Pickleball Performance tiles were used to perfectly fit the space. The design helped create an outdoor environment that inspires hope and pride, prioritizing both form and function.

MODULAR BY DESIGN

Easily installed over the old substrate, designed for both safety and versatility. This multi-sport surface features two pickleball courts, half-court basketball, four-square, and hopscotch.
